Forecast for Sunday 24 Sep 2023

Weather: Rainfall overnight will die out towards dawn, southeasterly gales will also ease for a time during the morning. Likely to be cloudy and dull during the morning, perhaps some drizzle around hills in the west and the Cuillin, some drier and brighter conditions may appear before lunchtime. An area of persistent and heavy rain will move across the area during the afternoon and evening, again the lightest rain to be found further north towards Ben Hope. The rain will be accompanied by southerly gales.

Chance of cloud-free hill tops above 800m: 30% early in the day, improving to 60% for a time then dropping to 40% during the afternoon, always more chance further north.

Low cloud and visibility: Extensive low cloud overnight, especially for ranges in the west and Skye. Cloud layers will lift during the morning towards the summits and become more scattered. More chance of clear summits and better visibility towards lunchtime. Cloud will thicken and lower during the afternoon, in the southwest broken layers of cloud above 400m can be expected, in the north perhaps scattered layers above 600m. Visibility during the morning will be moderate or good, although poor in periods of drizzle in the west, improving moderate or good around the middle of the day before turning poor in persistent and often heavy rain by mid to late afternoon.

Met Office Aberdeen Meteorologist's View

Feeling chilly on Sunday morning in rain and gale force winds adding to the wind chill effect. Then feeling quite mild later, especially towards the far north. Although winds may ease for a time they will steadily increase during the afternoon.

Forecast for Monday 25 Sep 2023

Weather: Rain clearing overnight and some clear spells developing. A bright start on Monday with some sunny spells possible but showers developing. Southwesterly gales accompanying showers, possible severe gales in the west and coastal ranges

Maximum wind: Southwesterly 30-35 mph with gusts 50 mph.

Chance of cloud-free hill tops above 800m: 70% chance of cloud free summits.

Low cloud and visibility: Scattered low cloud above 600m during the day, thickening around heavier showers. Visibility outwith showers will be good, becoming moderate in showers.

Temperature: **Glens:** Plus 10 rising to 15 Celsius.
At 800m: Plus 8 Celsius.
Freezing level: Above all summits.
